

Time heals all

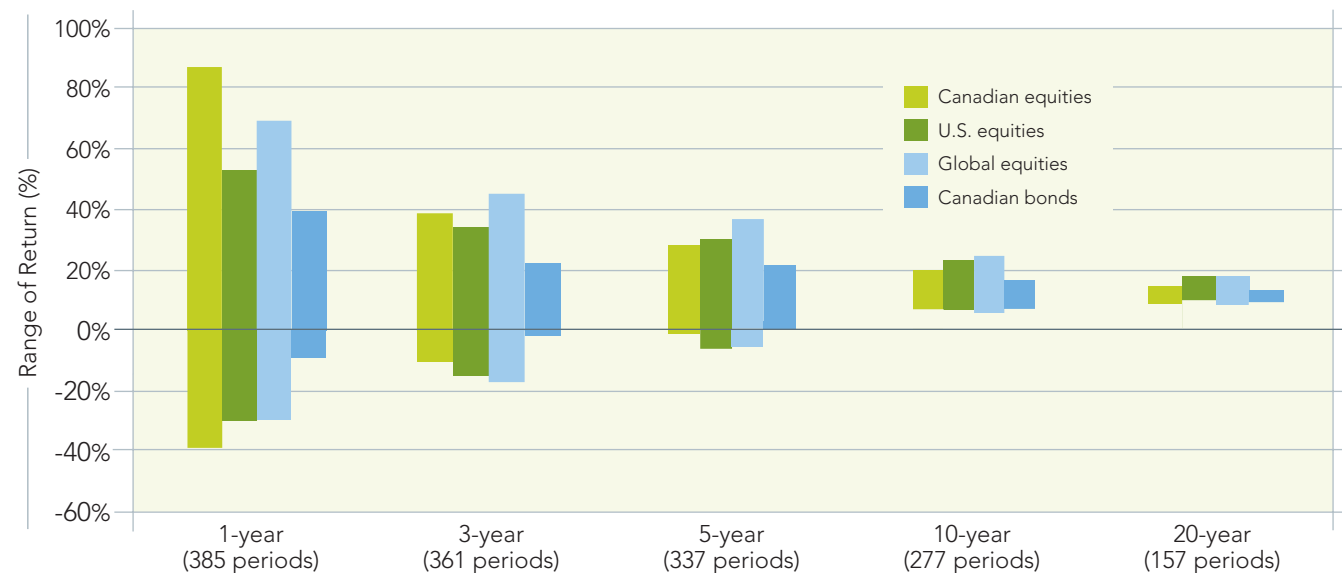

Many investors shy away from equity investments, fearing volatility. It's true that over the short term, equity returns can fluctuate substantially. But historically, equities tend to become less volatile the longer you hold on to them, while continuing to provide the potential for growth.

While it's important to be aware of risk, being too conservative can also be risky. Interest-bearing investments alone may not generate the growth you need to build retirement savings – especially when inflation is factored in.

Putting at least some of your money in equities may give you a better chance of reaching your savings goals. And the longer you have to invest, the less of a concern volatility should be.

Time reduces volatility of return

A comparison of the highest and lowest returns for various investment time frames from January 1, 1974 to December 31, 2006*

*For example, the results for the one-year investment timeframe are based on 385 sample one-year periods: Jan. '74 to Jan. '75...Dec. '05 to Dec. '06. Sources: Datastream and FMR Corp. As at December 31, 2006. Indices used: Canadian equities: S&P/TSX Composite Index; U.S. equities: S&P 500 Composite Index; global equities: MSCI World Index; Canadian bonds: Scotia Capital Universe Bond Index. Based on monthly total returns (CDN\$). Past performance is no guarantee of future results. The indices returns presented are calculated using total returns from January 1974 to December 2006. The 3-, 5-, 10- and 20-year periods reflect annualized returns. It is not possible to invest directly in an index. Returns are in \$CDN and include reinvested dividends. Effective May 1, 2002, the TSE Composite Index was retired and replaced with the S&P/TSX Composite Index. For more information on the changes to this index, please visit tse.com.

Read a fund's prospectus and consult your financial advisor before investing. Mutual funds are not guaranteed; their values change frequently and past performance may not be repeated. Investors will pay management fees and expenses, may pay commissions or trailing commissions, and may experience a gain or loss.
